QUARTER 3 IMPACT REPORT

July, August and September 2026

ABOUT LAKEHUB

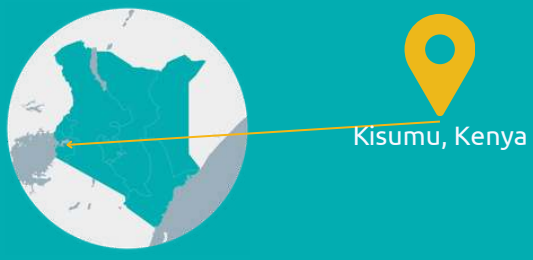

Vision

Lakehub was founded with the belief that investing in tech education and development of Africa's youth is essential for the growth and progress of the continent, and it is committed to providing the resources and support that these young people need to reach their full potential.

Through Zone01 Kisumu, we provide youths from all backgrounds with an opportunity to learn software development from scratch through peer-to-peer activities after which, they are guaranteed employment.

Mission

Our mission is to **decentralize access to technology tools and resources**, making them readily available to young people in underserved areas. By providing comprehensive tech education, mentorship programs, and access to cutting-edge technology, we equip young individuals with the skills and resources necessary to succeed in a digital economy

NOTE FROM THE CO-EXECUTIVE DIRECTORS

If there is one thing Q3 reminded us of, it is that progress rarely arrives quietly.

Sometimes it comes as a new partnership. Sometimes it looks like a learner tripling their income. Sometimes it comes wearing an award. And sometimes it looks like 50 women showing up to learn how to code and collectively deciding that "I'm not technical" is no longer an acceptable excuse.

At LakeHub, Q3 was full of these moments.
A major highlight was seeing 17 learners from our second cohort triple their income. 3x their previous income is not just a number on a report, it represents greater financial independence, new opportunities, and tangible evidence that investing in skills can change lives.

Speaking of investing in people, **we are incredibly grateful to Mastercard Foundation, whose support is enabling our apprentices to receive stipends**. For many young people, having the opportunity to learn is one thing; being able to afford the time and basic costs required to learn is another. This support helps remove that barrier and allows our apprentices to focus on building skills and building their futures.

We also had the opportunity to be part of the The Next Beat, a Segal Family Foundation event in Nairobi, and it was one of those occasions that reminds you why ecosystems matter. It was wonderful to reconnect with partners, meet peers doing inspiring work, and make new connections. As much as we like to pretend that everything can be solved through strategy documents and Zoom calls, sometimes the most valuable thing you can do is get into a room with good people and start talking.

And apparently, the ecosystem agreed with us because we came home with a few awards. **LakeHub was recognised at the Spicy Awards as the Best Incubation Hub.**

We are deeply grateful for the recognitions. Awards are, of course, not the reason we do this work. But they are a wonderful reminder that the work is being seen and that the organisations and people building solutions from places like Kisumu deserve to be recognised.

Perhaps one of our most exciting milestones this quarter was our largest women-only cohort yet: 50 women.

And if Q3 taught us anything from that experience, it is that getting women into technology is about much more than simply opening the doors. It requires creating an environment where they can learn, belong, persist and thrive.

Fifty women choosing to step into technology is fifty reminders that talent is everywhere. Opportunity, unfortunately, is not.

We continued to explore the intersection of technology and climate through our Kijanispace and Agritech hackathons. These programs brought together young people to think creatively about some of the most urgent challenges facing our communities, from climate resilience to agriculture. Because while we are busy teaching people to build technology, the technology also needs to solve actual problems. Preferably some of the big ones.

We also congratulate our partner, Partners For Equity, on the successful launch of the Local Leaders Fund. The fund works with African-led organisations to deliver real impact in their communities. We can't wait to see the big changes that the fund brings across African communities!

Looking back at Q3, what makes me most proud is not any single milestone. **It is the growing evidence that the different pieces of our work are beginning to connect: skills development leading to income growth; partnerships creating opportunities; women entering spaces where they have historically been underrepresented; and young innovators using technology to tackle challenges that matter.**

There is still a lot of work to do. Fortunately, we have never been particularly intimidated by that.

To our learners, apprentices, partners, mentors, staff, supporters and the wider LakeHub community: thank you. Thank you for believing in the work, challenging us to do better, opening doors, sharing opportunities, and occasionally reminding us that whatever we planned in January was probably going to change by September. Q3 was a strong quarter.

And if these results are any indication, we are only getting started.

With gratitude,

Dorcas Owinoh & Caleb Nyoiro
Co-Executive Directors

LAKEHUB FOUNDATION'S IMPACT SO FAR

LakeHub Foundation has been a pillar for women and youth hoping to create a brighter future for themselves

LakeHub Foundation has spent the last 9 years building one of Kenya's most effective pathways for transitioning underserved youth into digital employment. Through FemiDevs, LakeHub Academy, Zone01 Kisumu, Chichwa, Agri-jobs For Youth, employer partnerships, and national digital skills initiatives, we have demonstrated that talent, not prior education or socio-economic background, is the strongest predictor of success in the digital economy.

We have trained over 10,000 women and youth in industry-relevant tech skills. We have driven entrepreneurship and economic empowerment at scale. **Our Acceleration/Incubation programs have supported 2,354 entrepreneurs, including 161 youth agri-preneurs, and facilitated KES 30 million in crowdfunding matching grants for 70 MSMEs** through partnership with German Corporation for International Cooperation (GIZ).

The Chichwa E-Commerce platform has enabled over 600 women in informal trading to grow their businesses online, delivering a 17% sales increase in its first phase and a fivefold increase in its second. We've also rolled it out for farmers in Kenya's underserved Arid and Semi-Arid counties. Complementary initiatives, such as the United Nations Industrial Development Organization-backed Opportunities for Youth in Africa program, helped 50 local entrepreneurs formally register their businesses, further strengthening the region's small business ecosystem.

Through partnerships with governments and organizations such as the Kenya Government, World Bank, the United Nations Development Programme, the United States Embassy in Kenya, the French Embassy in Kenya and Somalia, and Safaricom, LakeHub has also driven regional innovation platforms, digital government solutions, and emerging AI-readiness programs cementing our role as a catalyst for inclusive economic growth across the Lake Region.

MASTERCARD FOUNDATION PARTNERS ZONE01 KISUMU TO BOOST TECH TALENT DEVELOPMENT

BIG NEWS!

We are extremely proud to share that LakeHub Foundation entered into a new partnership with Mastercard Foundation through Shortlist Futures to strengthen Zone01 Kisumu's pathways from technology training into meaningful employment.

The partnership brings together Zone01 Kisumu's proven peer-to-peer, project-based approach to developing software engineering talent with Shortlist Futures' expertise in designing apprenticeship and work-based learning programs that respond to the needs of employers, funders and young professionals.

Through the partnership, **Shortlist Futures will support Zone01 Kisumu apprentices with monthly stipends as well as creating clearer pathways for the learners to gain practical workplace experience.**

Shortlist Futures has extensive experience developing work-based learning programmes across Africa's growth sectors, supporting thousands of young professionals to launch their careers. This experience will complement LakeHub Foundation's efforts to equip young people with market-relevant technical and professional skills while strengthening connections with employers.

Starting in Q3 2026, the partnership lays the foundation for expanded employment opportunities for Zone01 Kisumu talent. By connecting skills development more intentionally with workplace experience and employer demand, LakeHub Foundation, Mastercard Foundation and Shortlist Futures aim to support more young people to transition successfully into sustainable careers within the digital economy.

"This partnership is an important step in connecting the incredible talent we are nurturing at Zone01 Kisumu to meaningful work opportunities. Together, we are creating stronger pathways for young people to turn their skills into sustainable careers."

- Dorcas Owino, Co-Executive Director, LakeHub Foundation

PARTNERS FOR EQUITY LAUNCH LOCAL LEADERS FUND TO STRENGTHEN LOCALLY-LED ORGANIZATIONS

Everyone at LakeHub Foundation congratulates our long-standing partner, Partners for Equity, on the launch of the Local Leaders Fund, an important new chapter in their commitment to strengthening locally led organisations across Sub-Saharan Africa.

Building on eight years of supporting African leaders, the Fund provides flexible, long-term financing alongside tailored strategic and operational support.

The Local Leaders Fund's approach i.e. Identify, Fund and Support, recognises that local organisations need more than funding to build sustainable impact.

Through hands-on support in areas including monitoring, evaluation and learning, fundraising, communications, governance and leadership, the Fund will enable local leaders to strengthen their organisations while retaining the flexibility to determine where resources are needed most.

The launch also provided an opportunity to demonstrate the growing capabilities of Zone01 Kisumu's digital talent. Four Zone01 Kisumu software developers were deployed to develop the Local Leaders Fund website, which was successfully launched alongside the Fund in Q3.

Working on a live product for an international partner gave the apprentices an opportunity to apply their technical and collaborative skills in a real-world environment while contributing directly to the Fund's digital presence. The engagement demonstrates how LakeHub Foundation's partnerships can simultaneously create value for partners and meaningful professional experience for emerging technology talent.

We are proud to have worked alongside Partners for Equity and to share their belief that African organisations are best placed to lead solutions rooted in their communities. Congratulations to Partners for Equity on this significant milestone.

We look forward to seeing the Local Leaders Fund strengthen local leadership and unlock even greater impact across the continent.

Check out https://localleadersfund.org/

LOCAL LEADERS FUND

DIGIKEN PROJECT IMPACT - IN NUMBERS

1739	1,005	40%	25	140
Certificates Awarded	Trainees Onboarded	Women Trained	PWDs Trained	MSMEs Onboarded

LakeHub Foundation through Zone01 Kisumu Surpass Targets And Delivers Real Impact Through Digiken

LakeHub Foundation successfully concluded the DigiKen Programme, surpassing the beneficiary target set in partnership with United Nations Women. The programme closed having onboarded **1,005 beneficiaries**, including **601 men and 404 women, with 826 learners completing formal training and 1,739 certificates awarded across different learning pathways**.

Throughout its implementation, **DigiKen delivered more than 16 workshops, combining practical digital skills development with mentorship and exposure to opportunities within the digital economy**. The programme also prioritized inclusion, reaching 25 learners with disabilities, while extending its reach to the entrepreneurship ecosystem through the onboarding of more than 140 MSMEs.

Closing the programme above the targets agreed with African Centre For Technology and UN Women represents a significant milestone for LakeHub Foundation. Beyond the numbers, DigiKen expanded access to relevant digital skills and strengthened opportunities for young people and small businesses to participate more effectively in the digital economy.

The programme's successful completion provides us with valuable lessons as we continue our work in delivering inclusive, accessible and market-relevant digital skills programmes.

THE NEXT BEAT CELEBRATES 20 YEARS OF INVESTING IN PEOPLE, PARTNERSHIPS, AND IMPACT ACROSS AFRICA

LakeHub Foundation joined our long-term partner and funder, Segal Family Foundation, at The Next Beat, a gathering marking 20 years of the Foundation's impact and partnership across Africa. The convening provided an opportunity to celebrate two decades of investing in locally led change while looking ahead to new approaches to catalytic philanthropy that can strengthen organisations, unlock opportunities and create lasting impact within communities across the continent.

As part of the convening, LakeHub Foundation's Co-Executive Director, Dorcas Owinoh, joined fellow innovators and ecosystem leaders for a dialogue titled "Building Sustainable Livelihoods and Economic Resilience in Africa: From Vision to Scalable Impact." The conversation explored what it takes to move promising ideas beyond individual interventions and build sustainable pathways to economic opportunity at scale.

Dorcas shared insights on creating pathways that connect young people to relevant skills, meaningful work, supportive networks and long-term economic opportunities. The discussion also provided space to exchange practical lessons, examine approaches that are working across different contexts and identify opportunities for greater collaboration among organisations committed to strengthening livelihoods across Africa.

The engagement reinforced LakeHub Foundation's belief that sustainable livelihoods require an ecosystem that extends beyond skills development. Through initiatives such as Zone01 Kisumu, and through partnerships with organisations such as Segal Family Foundation, LakeHub continues to connect young people to the skills, networks and opportunities required to participate meaningfully in the digital economy.

LAKEHUB FOUNDATION NAMED ACCELERATOR OF THE YEAR AT THE 2026 SPICY AWARDS

"This recognition belongs to every grassroots entrepreneur we have walked with in the Lake Victoria region and beyond. We believe in the power of local ideas to create global impact" - Caleb Nyoiro, Co-Executive Director, LakeHub Foundation.

In Q3 2026, LakeHub Foundation was named Accelerator of the Year at the inaugural SPICY Awards 2026 in Nairobi, recognizing our contribution to entrepreneurship, innovation and the growth of grassroots enterprises in Kenya.

The award, presented under the Entrepreneurs category, celebrates purpose-driven organisations creating meaningful value and advancing sustainable development.

This recognition highlights our work supporting entrepreneurs, innovators and community-based enterprises through incubation, acceleration, digital skills development, networks and access to opportunities.

Particular emphasis has been placed on supporting women-led startups, youth ventures and grassroots entrepreneurs to transform promising ideas into viable and sustainable enterprises.

Speaking after the recognition, LakeHub Foundation's Caleb Nyoiro dedicated the award to the communities and entrepreneurs supported by the organisation.

LAKEHUB FOUNDATION'S ZONE01 KISUMU IS SHAPING THE FUTURE OF TECH AND TALENT

Zone01 Kisumu is a peer-to-peer, project-based digital skills training model of learning that identifies, trains, and supports youth into software development and digital work pathways.

Zone01 Kisumu is designed for young people from diverse educational backgrounds and does not rely only on formal qualifications. We emphasize aptitude, problem-solving, resilience, collaboration, self-directed learning, and employability as the core pillars of the program.

We are based in Kisumu, a vibrant city on the shores of Lake Victoria, known for its stunning sunsets and a dynamic youth population eager to learn, innovate and build their futures.

Through Zone01 Kisumu, we are harnessing this potential by equipping young people with world-class technology skills and connecting local talent to opportunities in the global digital economy.

ZONE01 KISUMU COHORT 2 ENTERS THE HOMESTRETCH

As we close Quarter 3, Zone01 Kisumu's Cohort 2 continues to demonstrate strong progress in transitioning young technology talent from training into employment. With only a few months left to complete their tech training, we are proud to report that job placement is picking up steam.

The cohort currently has **103 apprentices**, including **29 women, representing 28% of the cohort and reflecting continued efforts to increase women's participation in technology careers**.

As mentioned earlier, employment outcomes accelerated significantly this quarter, with the number of **Cohort 2 apprentices placed in jobs increasing from 5 to 17**. This represents 12 additional job placements and a **240% increase from the previous quarter**.

Overall, approximately 16.5% of the cohort has now transitioned into employment, emphasizing our belief that employer demand for the skills developed through Zone01 Kisumu's peer-to-peer, project-based learning model is solidifying.

Employed Cohort 2 apprentices are currently earning an average of KES 33,882 ($260) per month, translating technical skills into tangible economic opportunities. The continued growth in placements strengthens Zone01 Kisumu's focus on connecting training to meaningful work and sustainable livelihoods.

FLOVIAN IS REBUILDING HER LIFE THROUGH TECH

Growing up, Flovian Atieno wanted to become an engineer. But when she shared the ambition with her father, he asked her if she'd ever seen a woman engineer. Like many African parents, he wanted her to go be a doctor instead.

Her path eventually led her to e-Mobilis, where she worked as a Google Digital Skills intern and got her first real exposure to people coding, building products and solving problems with technology. The "coding bug" bit. She wanted to build. She just didn't know how. In the meantime, she contributed to media assignments documenting women's success stories under PEPFAR and Wezesha Dada, travelling as far as South Africa to capture these stories.

At just 23, life changed dramatically. Someone dear to her was diagnosed with an aggressive cancer, and for nearly two years, Flovian became a primary caregiver, spending significant periods in and out of hospital. Her ambitions in technology gradually slipped further away. Without the practical experience she believed the industry required, she began to question whether a career in tech was still possible.

Yet during this difficult period, the people closest to her never lost sight of her potential. Her brother and a close friend came across information about Zone01 Kisumu and encouraged, almost pestered, her to apply. Flovian attempted the selection process while still balancing caregiving responsibilities. She particularly remembers attempting the games in the lonely and quiet halls of the hospital hall. It became an unexpected doorway back to a dream she had almost abandoned.

Joining Zone01 Kisumu gave Flovian more than an opportunity to learn programming. The programme's structure, routine, peer-to-peer learning environment and access to professional counselling support provided stability as she navigated a difficult personal transition. She immersed herself in coding, collaborative problem-solving and increasingly, technical project management.

Her abilities quickly became evident. Flovian has since led technical teams and worked on solutions addressing real community challenges. At the time of writing, Flovian has successfully led her team to develop and deliver the Local Leaders Fund website project, that has just launched. She's also leading a team working on a crowdfunding platform exploring decentralized Bitcoin technology to mobilize resources towards keeping Lake Victoria clean.

Beyond delivering projects, Flovian sees her journey into technology as a guiding light that makes the path more visible for other young women. Her passion for increasing women's representation in technology has already seen her work with Technovation to introduce young girls to technology and encourage them to imagine themselves as creators, builders and problem-solvers.

While she continues to rebuild after a challenging chapter of her life, she credits the structure and community at Zone01 Kisumu with helping her regain direction and confidence. From nearly giving up on technology to coding, building solutions and leading technical teams, Flovian's journey demonstrates what can happen when talent meets opportunity, community and the right support system.

The question her dad asked her as a young girl, whether she had ever seen a woman engineer, now carries a different meaning. Flovian is becoming the representation she once needed to see.

CONNECTING ZONE01 KISUMU TALENT TO GLOBAL OPPORTUNITIES AT U.S-AFRICA FORUM

During the quarter, LakeHub Foundation participated in the **2026 Mandela Washington Fellowship Alumni Forum on U.S.–Africa Commercial Partnerships** held in Nairobi, Kenya, where LakeHub Foundation's Co-Executive Director served as the Master of Ceremonies.

The three-day forum convened more than 160 Mandela Washington Fellowship alumni entrepreneurs, investors and business leaders from across Africa, alongside U.S. Government officials, American Chambers of Commerce in Africa, U.S. companies and development agencies. Discussions focused on strengthening trade, investment and sustainable commercial partnerships between African enterprises and U.S. companies.

The forum provided a unique platform to highlight the progress of Zone01 Kisumu as a source of emerging African technology talent. Building on partnerships and market linkages established in the recent past, **Zone01 Kisumu developers are currently working with three U.S.-based companies**, demonstrating the programme's growing ability to connect locally trained software developers with international opportunities.

This engagement reflects LakeHub Foundation and Zone01 Kisumu's broader approach of going beyond technical skills development to create pathways into employment, professional networks and global markets.

The relationships cultivated through platforms such as the Mandela Washington Fellowship ecosystem complement LakeHub and Zone01 Kisumu's recent partnership-building efforts and contribute to positioning Kisumu and the wider region as a competitive source of digital talent.

The forum also created opportunities to deepen relationships with entrepreneurs, investors, development partners and institutions working across artificial intelligence, digital transformation and other high-growth sectors.

These connections will support LakeHub Foundation's continued efforts to expand industry partnerships, unlock opportunities for Zone01 Kisumu developers and strengthen the programme's contribution to Africa's growing digital economy.

WE RAN TWO WOMEN-ONLY SELECTIONS. WE WERE NOT READY! HERE ARE THE LESSONS WE LEARNED

We thought the hard part of a women-only tech programme would be teaching the tech. It wasn't!

In Quarter 3, we hosted women-only selection piscines, marking an important step in efforts to increase women's participation in technology and create more equitable pathways into software engineering careers.

While participants undertook the same rigorous coding challenges and were held to the same technical standards, the experience demonstrated that meaningful inclusion requires addressing barriers that exist beyond access to computers, connectivity and curriculum.

The Piscine was intentionally designed to respond to some of the practical realities affecting women's participation in intensive technology training. **Recognising that several candidates were mothers, Zone01 Kisumu provided in-house childcare support, enabling participants to focus on learning without having to choose between caregiving responsibilities and their training.**

Additional attention was given to security, particularly for candidates using the campus during late hours. Structured onboarding, communication protocols and regular feedback sessions were also introduced to promote discipline, ownership and active participation throughout the programme.

Beyond technical learning, weekly check-ins created space for candidates to openly discuss challenges, seek clarification, build confidence and receive support from peers and staff. Constructive feedback during technical assessments focused not only on identifying gaps but also on helping participants understand how to improve. Community-building and recreational activities further strengthened peer relationships and provided opportunities to decompress from the intensity of the Piscine.

The experience generated important lessons for Zone01 Kisumu's approach to gender inclusion. Providing women with equal opportunities does not mean lowering standards or simplifying technical challenges; it means intentionally addressing the conditions that may prevent them from competing on equal footing.

The women-only Piscine demonstrated that inclusion requires infrastructure, responsive programme design and sustained support. These lessons will inform future recruitment, training and learner-support strategies as Zone01 Kisumu continues working towards greater representation of women in technology.

Q3 EVENTS

Building with Earth Observation Data, IoT and AI

9 teams made up of Zone01 Kisumu apprentices showcased climate-smart solutions using Copernicus Earth Observation data and the Kijani Box to address challenges facing communities in the Lake Victoria Basin.

Feed Sync, Nemo and Jonam emerged as the top three teams. The hackathon demonstrated the potential of SpaceTech, IoT and local innovation to strengthen livelihoods and climate resilience.

The Green Tech Hackathon 2026

A 48-hour innovation challenge that brought together 100 apprentices to develop technology-driven solutions to environmental challenges facing the Lake Victoria Basin.

Working in multidisciplinary teams, apprentices designed and prototyped ClimateTech solutions, strengthening their technical, collaborative and problem-solving skills while exploring innovations for climate resilience, environmental sustainability and green economic opportunities.

Tufunzeni Teachers Summit 2026

We were proud to host the second annual Tufunzeni Teachers Summit in Q3. Our partnership with Tufunzeni has continued to flourish as we prepare teachers to deliver future-ready education.

Tufunzeni's Executive Director, Dennis Omolo emphasized adaptability, lifelong learning and human-centred teaching even when using new tech tools to enhance teaching. We continue to create opportunities for educators to strengthen their practice and better prepare learners for a rapidly evolving digital world.

AI & Software Engineering Mini Conference

Zone01 Kisumu Cohort 2 apprentice Elizabeth Omito led a mini conference on what it means to be a software developer in a shifting industry.

The conference explored an ongoing theme that developers tackled in Q3 - If AI can write code, debug, explain, and even build, what does it mean to be a software engineer? We are encouraged that Zone01 Kisumu software developers understand the prevailing job market dynamics as they transition to the workplace.

THE TEAM

Gender Balance

60/40

At the heart of LakeHub and Zone01 Kisumu is a team dedicated to empowering youth through transformative tech education. Our team is committed to building a future where opportunity is driven by skills, innovation, and collaboration. We foster a supportive, inclusive environment that nurtures talent and drives lasting social impact across Western Kenya and beyond. We are pleased to add Rodgers Kaunda, a Zone01 Kisumu Cohort 1 trainee, to our staff. He has joined the Tech Team

STATEMENT OF EXPENDITURE

Statement of Expenditure (Cumulative to End of Quarter 3).

*As at **30 September 2026**, total revenue was **USD 512,153.34 (108%)** of the approved annual funding requirement. The funding surplus carried forward to the next period was **USD 37,883.41 (8%)**.

*Total expenditure amounted to **USD 401,122.78 (85%)** of the approved annual budget, leaving **USD 73,147.14 (15%)** available for planned activities in the 4th Quarter of the Year.

Revenue	Budget USD	YTD Actuals USD	Variance	Variance %
Grant Inflows		480,895.56		
Other earnings (Project Income)		31,257.78		
Total Revenue	**474,269.92**	512,153.34	37,883.41	8%

Expenses				
Program Expenses	287,142	253,476.83	-33,665.34	-12%
Operational Costs	187,128	147645.95	-39,481.8	-21%
